

GitLab accelerates workload deployments on AWS

Your DevOps journey made simple

Get collaboration and control

Industry-leading version control and scalable collaboration tools for a single source of truth.

6x faster

Software builds down from 3 hours to 30 minutes

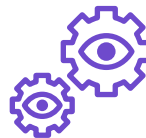

Streamline processes

Work in parallel with a single system, start testing and fixing vulnerabilities upstream

2x more efficient

Upstream testing goes from 50 days to 21 days

Know who's doing what, when

A single point of contact to help your team make better decisions

Increase build speed by **59x** Cycle time improvements by **14%**

You want it all

Speed

Control

Efficiency

Low cost

Visibility

Eliminate bottlenecks

A scalable, automated solution to deploy on AWS

Increased delivery speed from 3-6 weeks to 30 minutes

32x
Faster delivery

Release faster

End-to-end visibility and insights enable faster, more reliable delivery

120x Faster QA **4x** More releases

Turn security challenges into opportunity

Built-in security and compliance standards that won't slow you down.

20+
Daily development environment deploys

Your complete DevOps platform, start to finish
