

# Philipp Hansch

GREIFSWALDER STR. 40 • 10405, BERLIN

0151 578 00 976 • [DEV@PHANSCH.NET](mailto:DEV@PHANSCH.NET) • [GITHUB.COM/PHANSCH](https://github.com/phansch) • [WEBSITE](#)

Experience in software development, most recently specializing in Rust, including

- 3 1/2 years of professional Ruby / Ruby on Rails experience
- Game development in Lua with Love2D as well as C# and XNA
- Desktop development in Java and C#, including interfacing with Oracle and SQL on Windows and Linux

## Experience

**May 2016 - Current**

Ruby Developer at Esanum GmbH

- Continuing work on the same software of Mobile Event Guide GmbH with a strong focus on healthcare customers.

**Oct 2014 - Feb 2016**

Junior Rails Developer at Mobile Event Guide GmbH

- Development and optimization/maintenance of customer facing tools:
  - CMS based on Ruby on Rails, including CoffeeScript, JQuery and Bootstrap 3 in the frontend
  - Mobile Website based on AngularJS and Ionic Framework, with a RethinkDB backend
  - Integration of customer interfaces for data imports (Ruby)
- Development and optimization/maintenance of internal tools:
  - Mobile app building system to configure and build iOS/Android apps (Ruby/Ruby on Rails)
  - Infrastructure automation with Ansible, Puppet and Mina

**Jan 2014 - Sep 2014**

Freelancer for Ruby on Rails

- Working with a team of Freelancers on different Ruby on Rails applications.
- Experience with Rails 4 and Postgresql on the back-end
- Experience with HTML5, CSS3 and Backbone.js on the front-end
- Setup and configured automated deployment infrastructure with TravisCI and Heroku
- Responsible for picking team communication and project management tools

**Winter 2013/2014**

Participant in Hackership

- Learning Ruby on Rails in a self-directed learning environment. Working on a web application that helps people learn touch-typing.

**December 2013**

Beginners Coach at RailsGirls Berlin Hackday

- Helping programming beginners gain a basic understanding of how programming works. Creating a basic Rails application and answering questions along the way.

## Projects

*Image Streamer*

[Source on GitLab](#)

Send screenshots to Sinatra server and have them neatly pushed to all connected clients.
